MEADOWLARK

One design, many surfaces - artwork by Anthony Vella (Jaws Atak), Medford, Oregon

The meadowlark "earth people" design - the digital master behind the mural, deck, print and apparel below.

The meadowlark is an original Pacific Northwest design that moves across surfaces: from a digital master to a downtown Medford mural, a skateboard deck, a signed fine-art print and apparel. One piece of art, built to carry - a fit for print, product and public-art projects alike.

On the wall - Bartlett & Middleford mural, downtown Medford

On a deck - live on BoardPusher

In print - signed JAWS GRAFFITI '24
